开工大吉

This month all management personnel and veteran workers returned to their posts on time to prepare for the work of the New Year. They embrace the challenges and opportunities of the New Year with passion and anticipation.

The management staff and workshop staff of Huasheng Industry held a routine meeting after the New Year holiday and looked forward to the work goals and plans for the New Year. Encourage everyone in the New Year to make persistent efforts to contribute to the development of the company.

SAFETY INSPECTION

Worker safety is also our top concern. In order to ensure that workers are always in a safe environment during their work and visit, we firmly implement a biweekly safety fire inspection system to ensure the normal operation of safety facilities and fire fighting equipment in all areas of the factory.

R&D

In just a few months, customers in six countries have ordered this new product, and we are stepping up production for our customers.

Update Simple Display Box

More and more customers are updating their color cards in 2024.
