

The R&D Room Has Been Upgraded

Modern design: The new background wall adopts a stylish and simple design style.

Company display: Huasheng's core products, vision and mission will be displayed on the background wall, so that everyone who comes to the R & D room can feel the company's cultural atmosphere.

Innovative elements: Integrating innovative elements reflects Huasheng's unremitting pursuit of technological innovation, and encourages the R & D team to constantly break through themselves and pursue excellence.

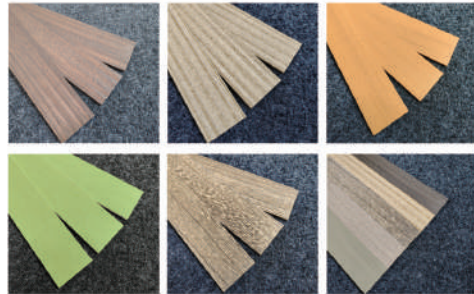

Welcome to a corner of Huasheng's research and Development room, the birthplace of innovation and inspiration. Here, we constantly challenge ourselves, pursue excellence, and create one product after another that leads the industry trend.

Crystal Metal Tassel

We are pleased to introduce to you Huasheng's latest innovation - crystal pull ring. This product is not only beautiful in appearance, but also has excellent practicality, which is the best choice for your home decoration.

New Color

Today, the R&D team of Huasheng reviewed and sorted out the color cards from 2019 to the present to find inspiration and inject new creativity and vitality into our future products.

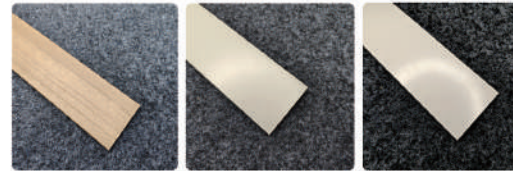

Bamboo

We are pleased to share with you that the R&D team of Huasheng brought back the precious gift of nature - high-quality bamboo and wood materials during the last trip. These bamboo trees not only let us feel the charm of nature, but also bring endless inspiration and possibilities to our product design.

We sincerely invite you to learn about and experience our bamboo and wood products. Huasheng will bring you natural, environmental protection and beautiful coexistence of excellent products.

Solid Content Test

Various options: high finish, matte finish and normal leaf finish to meet your different design needs and

Quality assurance: We strictly control every step of the production process to ensure that every slat has excellent quality and durability.

Innovative design: We are constantly innovating and improving to provide you with products that are not only beautiful but also functional, making your living space more colorful.

Paint Solid Content Test

At Huasheng, we are committed to ensuring the highest standards of quality and performance in every product through rigorous laboratory testing. Today, we focus on solid content testing in laboratory testing, which is one of the important indicators to evaluate the stability and quality of products.

Drop testing for mail order Blinds

Test drop video - demonstrates product strength and reliability

Huasheng is proud to present our latest drop test video, demonstrating the superior strength and reliability of our products. These tests not only validate the quality of our product design and manufacturing, but also demonstrate our commitment to providing our customers with the highest standards of durability and protection.

4 M Telescopic Rod

Efficient and convenient telescopic rod – create endless possibilities

Huasheng is proud to introduce our 4-meter telescopic rod, which not only combines modern technology and engineering design, but also brings unlimited convenience and possibility to your work and life.

From the smallest to the largest length can be adjusted to 4 meters, to meet different scenes and needs, suitable for home decoration, but also to meet the needs of construction sites.

The lightweight material makes it easy to carry and operate when expanding, ensuring your work efficiency.

After strict material selection and testing, to ensure the stability and durability of the telescopic rod during use.

Safety Inspection

At Huasheng, safety is our top priority. We are committed to ensuring that our products and services meet the highest standards through rigorous safety inspection procedures, providing you with peace of mind and a reliable user experience.

Product quality testing: In the production process, we strictly control every link, the use of high-quality raw materials, and through multiple quality testing, to ensure that products meet international standards and customer needs.

Process and manufacturing process: We use advanced process technology and equipment for production and manufacturing to ensure that every product is precision machining and strict inspection.

Compliance with safety standards: We strictly abide by and implement various safety standards and regulations, including environmental protection, occupational health and safety, etc., to ensure the safety and reliability of the production process and products.
