## Green Factory Launch Meeting

"Green factory, intelligent production, sharing an environmentally friendly future."

"Here, every process is to inject green life into the earth. Our green factory, with environmental protection as the core, reduces carbon emissions through intelligent manufacturing, from raw materials to production processes, the whole process is sustainable. We not only produce high quality products, but are more committed to leaving a broken blue sky for the next generation. Choosing us is choosing a green commitment to a greener future together."

## Welcome government leaders to visit Huasheng Industry

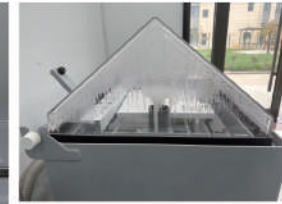

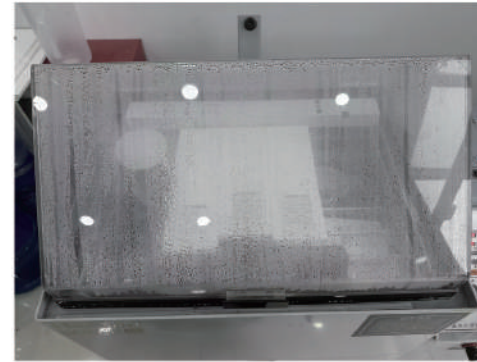

This visit not only reflects the government's high attention and strong support for the development of enterprises, but also fully affirms our efforts and achievements, injecting new impetus and confidence into our future development.

## R&D and T&Q

Our R&D team regularly holds 4-5 in-depth discussions every week, focusing on technological innovation and product development, and always insisting on bringing more high-quality new products to customers, striving tirelessly to achieve value breakthroughs.

Salt spray testing aims to evaluate the corrosion resistance of products in high salt environments, providing important references for durability and reliability.

Test result:  
Qualified / Unqualified

## Aluminium Shutter

Aluminum Windows have a light weight, while having good durability and strength. They can withstand high wind pressure and earthquake resistance, and can be used for a long time without deformation or breakage.

# Fauxwood Blinds

## • New Color

- More colorful: adding multiple popular colors to easily capture market trends.
- Clearer classification: Scientific layout makes selection more convenient.
- Comprehensive quality upgrade: The spindle color is precise and accurately reproduces the product effect.

## • Production Process

Our PVC production line integrates advanced technology and customized management to provide you with efficient, environmentally friendly, and stable production solutions, helping to create high-quality PVC products. Whether it's meeting mass production needs or achieving personalized customization, our PVC production line is always your most reliable choice.

## • Assemble

We focus on every detail, with strict craftsmanship standards and excellent technical strength, creating consistently outstanding quality with ingenuity.

CEO:  
Che Lubiao

Warm sailing, protect health - Our hospital officially opened!

The team is ready to protect your health and care for every patient.

Strive to make you a full range of professional and caring in every detail of a medical experience.medical experience.

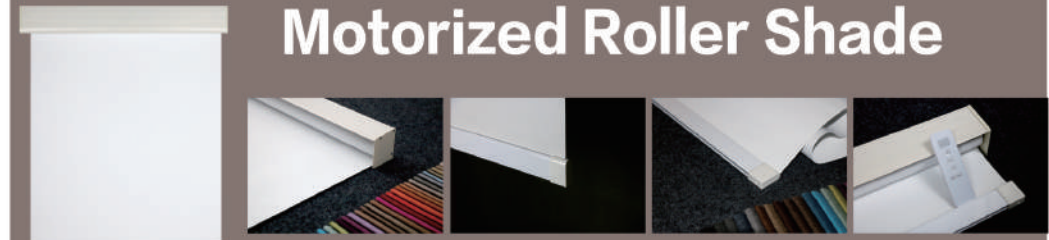

With the care and support of all sectors of the community, the opening of our hospital came to a successful end. Thanks to every friend and partner who attended the event. It is your trust and encouragement that makes us more confident in providing quality medical services to the society.

# Roller Cutting Machine

The rolling shutter cutting machine is an efficient cutting equipment designed specifically for rolling shutter fabrics, equipped with fast cutting capabilities. It can accurately cut fabrics according to needs, ensuring neat edges and no size errors.
